## Qi beauty™ Treatments deliver a constellation of results

Certificate training teaches Matrix treatments to effect cell mobility, action, energy and trajectory to levitate dermal compounds (gags), synchronise cellular kinetics, recalibrate cellular function and visibly lift tissues. Treating ageing skin is our speciality. A therapist uses these energetic functions to increase cellular signalling to activate many processes all at the same time.

Treating skin ageing with dermal recovery is our speciality.

Skin becomes instantly responsive to a static magnetic field matrix. Qi beauty™ certification training teaches practitioners to identify this during matrix stimulation; changes in tissue density, structure, and colour alert us to the bio-mechanical processes that are occurring;

- manipulate the lipid bi-layer
- optimise vaso-normative micro-circulation
- raise dermal compounds including gags
- initiate oxygenation via ETC
- detoxify via the bio-electric system
- achieve homeostasis determining qi arrival
